

dedicated.
that's us.

For over 45 years, we've been excelling at generic R&D and production, giving our customers timely and responsive support in an agile, flexible, and reliable manner, fulfilling your every need and expectation.

This is how we do business, and this is how we succeed.

Unipharm, one of Israel's leading generic pharmaceutical companies, has undergone significant growth in recent years. Our new, EU-GMP certified manufacturing facility, opened in 2017, offers the latest technology in oral solid and oral solution development and production. Our generic portfolio spans a wide range of therapeutic areas, including unique niche opportunities.

We've made a name for ourselves through our involvement in the shaping and development of intellectual property laws in Israel. Our legal achievements in pharmaceutical patent cases have led to a consistent track record of successful and early generic launches.

Unipharm's generics are offered for out-licensing to all international markets. Our EU CTD dossiers are available along with full regulatory support to achieve successful and swift marketing approvals. Zone IVb stability data is also available.

With our dedication – your early launch is guaranteed!
